

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	2 October 2026
Team ID	SWTID-2026-8368
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare
🕒 1 hour to collaborate
👤 2-8 people recommended

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

C Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we turn a one-line idea into a finished illustrated comic in about two minutes?

2

Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP
You can select a sticky note and hit the pencil (switch to select) icon to start drawing!

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Step-2 / Step-3 detail: ideas, clusters and priority (enlarged for readability)

Problem statement: How might we turn a one-line idea into a finished illustrated comic in about two minutes?

Ideas written by each team member (10 minutes):

Fahmiya: Outline-story; 2 Gemini models; Retry on 429; FastAPI backend; Panel layout JSON; PDF export; Cache outlines; Async jobs; Rate-limit guard.

Nivriti: SD v1.5 on MPS; fp16 speed; Consistent style; Panel prompts; Negative prompts; Seed control; Smaller steps; Pipeline reuse; Filter off.

Mounika: Genre picker; Progress bar; Panel grid view; Dark mode; Mobile layout; Edit caption; Download button; Gallery page; Fonts for captions.

Tharun: Pytest suite; Mock Gemini; Mock SD; Layout tests; PDF test; Route tests; Load timing; Bad inputs; CI on push.

Yuvaraj: Demo script; Project docs; Sample comics; README guide; Screenshots; Video demo; User survey; Report writing; Poster.

Grouped ideas (20 minutes):

- Story generation: Outline-story, 2 Gemini models, Retry on 429, Cache outlines
- Image pipeline: SD v1.5 on MPS, fp16 speed-up, Panel prompts, Seed control
- User experience: Genre picker, Progress bar, Panel grid view, Mobile layout
- Quality & delivery: Pytest suite, PDF export, Mock Gemini, Demo script

Prioritisation (importance vs. feasibility, 20 minutes):

- High importance, high feasibility (build first): Outline-then-story generation, Image per panel, PDF export.
- Important, moderately feasible: Live progress, Genre picker, Retry on 429 (rate limits), Seed control.
- Low priority / future work: Dark mode, Poster.
